TECHNICAL DATA SHEET

NO.2 BELLTRONIC™ BANK UNIT DATA SHEET

PRODUCT DETAILS

This unit is smaller, more compact and has the same features as that of the Standard Bank Unit.

The purpose of this unit is to communicate between the banksman and the driver and is situated on the bank (surface).

The unit is manufactured in stainless steel and equipped with:

- A push button signalling device to communicate to the driver.
- Evolution or D-Tronic PC Board.
- Fitted with either a PP, Castell or Fortress key switch.
- Various audible devices, such as bell, sounder, cybertone, etc.
- The unit is available in either 32V / 110V AC or 32V DC.
- This unit is fitted with a "Telltale" sounder.

Note: The unit has a switch off facility feature and always completes every signal rung.
